## Trends in the UCITS Market

### *Net Sales by Investment Type*

**UCITS enjoyed a surge in demand in the first quarter to EUR 130 billion, marking the largest quarterly net inflows since the first quarter of 2006. This compares to net sales of EUR 78 billion in the previous quarter.**

Long-term UCITS attracted EUR 132 billion in net new money during the quarter, up from EUR 106 billion in the fourth quarter. Equity funds recorded net inflows of EUR 44 billion, up from EUR 30 billion. Bond funds recorded strong net inflows of EUR 44 billion, albeit lower than the fourth quarter when net inflows amounted to EUR 61 billion. Balanced funds registered increased net inflows of EUR 36 billion, up from EUR 13 billion. In contrast, money market funds registered net outflows of EUR 2 billion, down from net outflows of EUR 28 billion in the previous quarter.

## Trends in the UCITS Market

### *Net Assets by Investment Type*

Investor confidence on the economic outlook strengthened in the first quarter as financial markets around the globe enjoyed a strong start to 2013, all of which fed into the high net sales of UCITS. This can be seen from the trends in monthly net sales<sup>1</sup> which remained at high levels throughout the period. Strong net sales of equity funds, coupled with strong demand for balanced funds during the quarter highlights investors increasing risk appetite. Nevertheless, net sales of bond funds remained at high levels as investors search for yield also continued given the low interest rate environment.

<sup>1</sup> Differences in totals between quarterly and monthly net sales reflect differences in the universe of reporting countries.
